2021

ABOUT ME

I am software engineer and web developer.
I have 3+ years of production experience.

WORK EXPERIENCE

2019-2021   **SOFTWARE ENGINEER**
EPAM

I had the experience of supporting the project, as well as the experience of introducing new features. I had the experience of presenting new features to the customer. I had worked with SCRUM and Kanban development approach, Continuous Integration and Software design patterns. I had successfully completed Java development course and Salesforce student program and got Salesforce certification. I also had experience in organizing CI processes in a team with 10+ people using Bitbucket Pipelines, Bash and Node JS.

2021-2022   **SOFTWARE ENGINEER**
EffectiveSoft

I had the experience of supporting the project, as well as the experience of introducing new features. I had worked with SCRUM and Kanban development approach, Continuous Integration and Software design patterns. I had experience in leading teams of 5+ developers. I had experience in designing project architecture, implementing new features, organizing Scrum processes.
